

we redefine **Ultrasonic** Cleaning Technology

ActOn Finishing Ultrasonic Cleaning Systems are designed to clean, descale and strip a large range of components, for industries such as automotive, aerospace, energy, electronics, food, graphics, jewellery, manufacturing, marine, mould cleaning, medical, optical and more.

we redefine:

- Surface Finishing
- **O** Shot Blasting & Peening **O**
- Ultrasonic Cleaning
- **O** Consumables
 - Precision Polishing
- Subcontract Services

Why Choose Us?

We're a family run business that pride ourselves on working as a strong, unified team of specialists.

We believe in British

Born in the United Kingdom, we are unique in our product design and the manufacture of our specialist machines and consumables.

We're here for you

Being based in the heart of the country means we have easy access to all of our clients.

We have experience

With five decades of experience and knowledge in the finishing industry, we know what works for you.

We provide options

We have an impressive range of media and compounds to choose from, including one of the best polishing compounds in the market. We also provide a wide range of machinery and subcontract services to meet all of your needs.

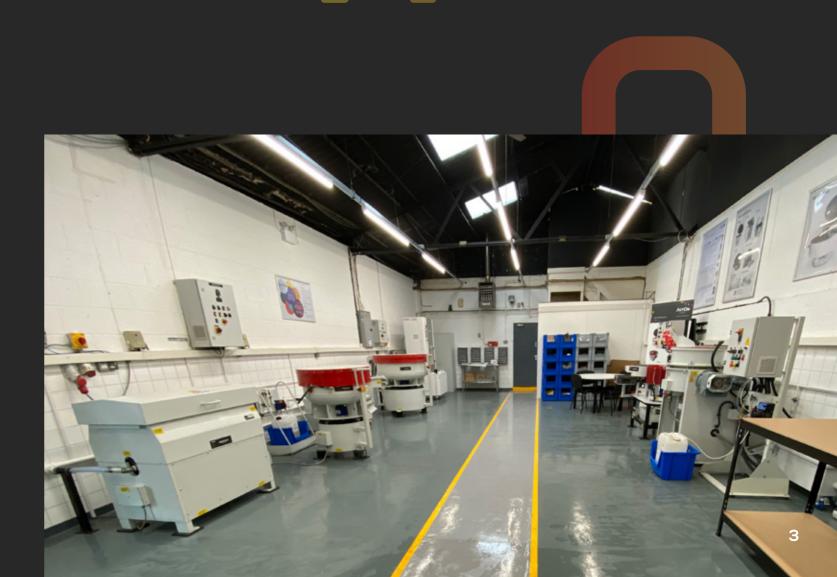

We go the extra mile

We'll tailor our services to your needs, not the other way round. Our service is all about you.

About Ultrasonic Technology

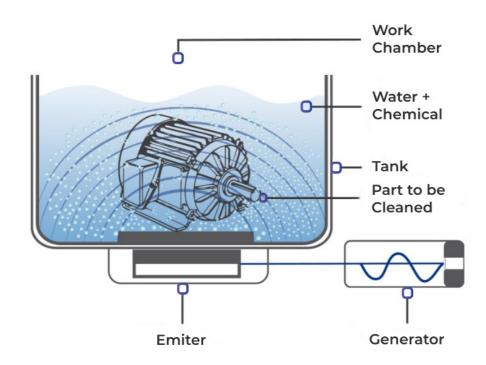

ActOn Finishing range of Ultrasonic Cleaning Technology includes a Standard Series, a Laboratory Series, the Ultrasonic Machines built for the Automotive Industry and Customised Ultrasonic Systems.

Ultrasonic cleaning is a finishing process, which works on the principle of ultrasound waves (28 to 40 KHz) created in a liquid (usually water or/ and chemical), to clean the parts.

How it works?

Component is placed in the Ultrasonic tank, in a mix of water and/ or chemical. A generator and ultrasound emitter agitate the liquid mix and create the waves, resulting in small bubbles. This action penetrates the particles that should be removed from the component, such as dirt, rust, grease, oils or any other materials that have to be removed.

TT Standard Series

The Ultrasonic Standard Series has been designed to clean, descale and pickling a wide range of components. These machines come in different sizes (from 30 litres to 7998 litres capacity) and can be built with a lifting platform for loading and unloading the parts.

Key Benefits & Features

- 0 Comes in a wide range of sizes.
- Can be offered with filtration system & oils separation and water treatment system.
- 0 Control panel with on/ off, timer, temperature setting, power level.
- 0 Can be offered with PLC and touch screen to control the process.
- Tank made out of INOX AISI 316 stainless steel.
- 0 External panel built out of fingerprint-resistant steel.
- 0 Thermo-acustic isolator.
- Stainless steel basket with anchorage system for loading, unloading and draining the components.
- Cleans even areas which are difficult to reach. 0
- Fast process.
- 0 80% reduction of cleaning time.
- 0 Energy cost reduction.
- Environmental friendly process.
- Repeatable results.

Custom sizes can be manufactured to suit specific applications. Dimensions are subject to change due to design improvements.

LT-PRO Series

Laboratory Ultrasonic System

The LT-PRO series includes a range of small-sized ultrasonic machines, designed for cleaning dental implants, small electrical parts, jewellery, watches, laboratory equipment, medical and surgical instruments and glasses. These systems are particulary useful as a previous step to sterilisation, in the medical and optical industries.

Key Benefits & Features

- 0 Comes in a wide range of sizes, with a capacity between 1 and 26 litres.
- 0 Designed with high-performance IBL titanium-steel piezoelectric transducers.
- 0 Machine working frequency of 40 KHz with a frequency sweep system (Sweep System ±2%)
- 0 Easy to use digital control panel, with on/ off, timer and temperature selection.
- 0 Tank made out of AISI 316 stainless steel.
- Ο External panel built out of fingerprint-resistant steel
- 0 Stainless steel basket.
- 0 Process temperature: between 0° to 80°C
- 0 Cleans even areas which are difficult to reach.
- 0 Fast process.
- 0 Energy cost reduction.
- 0 Environmental friendly process.
- Repeatable results.
- 0 Can process delicate parts without damaging these.

MOT Series

Ultrasonic Systems for Automotive Industry

The Ultrasonic MOT range includes machines with a capacity between 30 and 8000 litres, which are built to clean oils, grease and carbon built-ups from automotive components such as turbocharger structures, carburettors, gearboxes, engine blocks, crankshafts, camshafts, con-rods, pistons and more. This equipment uses a working frequency of 40kHz (sweep system +2%) to efficiently process soft materials such as aluminium, brass or magnesium, without damaging the components.

Key Benefits & Features

- Designed for garage workshops, commercial vehicle repair workshops, marine engine repair, electrical engineers, aerospace industry, precision and general engineering, engine rebuilding and turbocharger repair shops.
- Elevating platforms are offered with these machines, with a capacity of over 75 litres, to load and unload the components.
- Can be offered with a filtration system & oils separation and water treatment system.
- Control panel with on/ off, timer, temperature setting, power level and DEGAS system to degas water.
- Can be offered with PLC and touch screen to control the process.
- Tank made out of INOX AISI 316 stainless steel.
- External panel built out of fingerprint-resistant steel
- Thermo-acustic isolator K-Flex Duct Net.
- Stainless steel basket with anchorage system for loading, unloading and draining the components.
- Height-adjustable legs.
- Cleans even areas which are difficult to reach.
- Fast process.
- **O** 80% reduction in cleaning time.
- Energy cost reduction.
- Repeatable results.

Tailored Solutions

At ActOn Finishing we offer a range of Ultrasonic Systems custom made for the automotive, aerospace, food, electronics, electroplating, graphics, machining and turning, maintenance, marine, mold, nuclear and medical and pharmaceutical industries. These ultrasonic machines are offered in a wide range of sizes and include 3 types of systems:

- **One-Tank Special Equipment.** 0
- 0 Special Equipment Manual Multistage.
- 0 Multistage Automatic Smart Line

One-Tank Special Equipment

The One-Tank Special Equipment are offered with a capacity ranging from 75 litres to approx. 2000 litres. All models are custom made for industrial cleaning and specific processes:

One-Tank TT350N

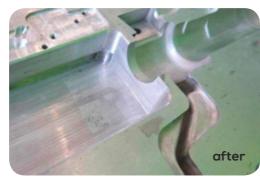

This model has been desined and built for cleaning molds for the manufacture of batteries in the energy sector. It is a customized single tank equipment and it includes a retention tank and a drainage pump with manifold and manual valve for emptying the tank.

Technical Specifications:

Useful dimensions (in mm): 670x620x600 Internal dimensions (in mm): 740x715x862 Capacity: 460 litres/16.2 cu.ft.

One-Tank TT400AC

A manual single tank with a capacity of 400 litres, it includes external stainless steel paneling and inclined tank bottom for proper cleaning and hot rinsing with spinners and filter discs. This Ultrasonic system has been built for the removal of plastic and polymers.

Technical Specifications:

Useful dimensions (in mm): 4000x200x500 Internal dimensions (in mm): 4000x200x600 Capacity: 400 litres/14 cu.ft.

One-Tank TT2900N

This Ultrasonic machine was designed with a single tank, with a 3000 liter capacity, for tire stripping. In order to collect and evacuate the sludge from the process, it has a tank made of AISI 304L stainless steel with a sloping bottom. A manual press-type filtering system with 30 plates has been added to this equipment, which helps to separate the liquid remains from the solid with the greatest efficiency.

Technical Specifications: Useful dimensions (in mm): 3280x610x1030 Internal dimensions (in mm): 3400x720x1325 Capacity: 3000 litres/ 106 cu.ft.

One-Tank TT3300N

The One-Tank TT3300N Ultrasonic cleaning equipment is built with a 3,300 litres tank and has an automatic heat-insulated lid. This system has been tailored for cleaning coolers in the naval sector.

Technical Specifications: Useful dimensions (in mm): 1200x1200x1700 Internal dimensions (in mm): 1300x1300x2070 Capacity: 3300 litres/116.5 cu.ft.

Technical Specifications for Other One-Tank Special Systems

On-Board 75L

Built for cleaning application in the Naval Industry. Useful dimensions (in mm): 650x300x290 Internal dimensions (in mm): 700x350x400 Capacity: 75 litres/ 2.6 cu.ft.

One-Tank 75L

Built for cleaning application for industrial components. Useful dimensions (in mm): 620x325x240 Internal dimensions (in mm): 650x390x470 Capacity: 75 litres/ 2.6 cu.ft.

One-Tank 300L

Built for cleaning application for Aerospace industry. Useful dimensions (in mm): 860x520x385 Internal dimensions (in mm): 900x615x640 Capacity: 300 litres/ 10.6 cu.ft.

One-Tank 435L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 2500x500x250 Internal dimensions (in mm): 2500x500x550 Capacity: 435 litres/15.3 cu.ft.

Tailored Ultrasonic Solutions

Technical Specifications for Other One-Tank Special Systems

One-Tank 1000L

Built for cleaning application for Automotive Industry. Useful dimensions (in mm): 1600x600x700 Internal dimensions (in mm): 1650x650x960 Capacity: 1000 litres/ 35.3 cu.ft.

One-Tank 2000L

Built for cleaning application for Automotive Industry. Useful dimensions (in mm): 3100x600x500 Internal dimensions (in mm): 3200x800x800 Capacity: 2000 litres/ 70.6 cu.ft.

One-Tank 2000L

Built for degreasing application for Naval industry. Useful dimensions (in mm): 1650x1010x790 Internal dimensions (in mm): 1750x1100x1080 Capacity: 300 litres/10.6 cu.ft.

One-Tank 10.000L

Built for degreasing application for General Engineering. Internal dimensions (in mm): 3660x2165x1500 Capacity: 10000 litres/ 353 cu.ft.

Special Equipment Manual Multistage

This equipment is designed for finishing processes which require different stages, such as rinsing, drying or different treatments in addition to cleaning. Depending on the component's cleaning requirements these machines can be built with a number of tanks, with a wide range of capacities. Here are some examples of customised Ultrasonic equipment developed to specification for our customers' needs:

Multistage Manual TT 150NC

A tailored manual multi-stage ultrasonic equipment built for a 6-stage process, including ultrasonic cleaning, hot rinsing, cold rinsing and drying. This system is designed with loading and unloading areas arranged in two sections with an angle of 90° between them.

Technical Specifications: Useful dimensions (in mm): 485x380x350 Internal dimensions (in mm): 700x430x590 Capacity: 150 litres/ 5.3 cu.ft.

Multistage Manual TT 3x150N

This Ultrasonic system has been developed for the medical-pharmaceutical sector and it includes tanks for a 3 stage manual process: ultrasonic tank hot rinsing tank and drying tank. For loading and immersion of the parts in the baskets a pneumatic lifting platform, with a maximum lifting capacity of 60 kg, has been added.

Technical Specifications: Useful dimensions (in mm): 640x400x325 Internal dimensions (in mm): 700x480x620 Capacity: 190 litres/ 6.7 cu.ft.

Click <u>here</u> to request a quotation today!

Multistage Manual TT 3x150N

A manual ultrasonic cleaning system with three tanks and a capacity of 195 litres, built for cleaning steel molds. It has 6 baskets with an upper anchoring system for loading, draining and unloading parts and it is built with rod and plates of SAE 304 stainless steel.

Technical Specifications: Useful dimensions (in mm): 550x400x400 Internal dimensions (in mm): 630x480x730 Capacity: 195 litres/ 6.8 cu.ft.

Multistage Manual TT 5x150N

A manual ultrasonic cleaning system for ultrasonic cleaning in the aerospace industry. It include 5 tanks to carry out te following: ultrasonic cleaning, hot ultrasonic rinsing, 2 hot rinsing tanks and a cold treatment tank.

Technical Specifications: Useful dimensions (in mm): 500x400x400 Internal dimensions (in mm): 581x480x725 Capacity: 190 litres/ 6.7 cu.ft.

Multistage Manual TT 2x600N

Manual double tank equipment with ultrasonic cleaning tank and hot ultrasonic rinsing tank, incorporates a pneumatic lifting platform for loading and immersion of the pieces, built in AISI 304 stainless steel, with a maximum load capacity of 500 Kg. The equipment integrates a waterflow system, a tank independent of the cleaning tank for capturing oils and particles in the main tank's surface.

Technical Specifications: Useful dimensions (in mm): 400x400x1600 Internal dimensions (in mm): 575x575x1960 Capacity: 715 litres/ 25.2 cu.ft.

Technical Specifications for Other Manual Mutistage Systems

2 Stage Machine 250L

Built for cleaning application for General Engineering. Useful dimensions (in mm): -Internal dimensions (in mm): 760x450x630 Capacity: 250 litres/ 8.8 cu.ft.

3 Stage Machine 150L

Built for degreasing application for General Engineering. Useful dimensions (in mm): 670x415x314 Internal dimensions (in mm): 700x510x540 Capacity: 150 litres/ 5.3 cu.ft.

5 Stage Machine 150L

Built for cleaning application for Railway industry. Useful dimensions (in mm): 415x670x340 Internal dimensions (in mm): -Capacity: 150 litres/ 5.3 cu.ft..

3 Stage Machine 1200L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 5000x300x500 Internal dimensions (in mm): 5100x335x750 Capacity: 1200 litres/ 42.3 cu.ft.

Multistage Automatic Smartline

The Automatic Smart series are fully automated systems with a load capacity ranging from 20 to 100 Kg. This equipment is designed to meet the highest requirements for industrial cleaning, thereby achieving cleaning results that meet the requirements and standards demanded by a wide range of industries. Here are some examples of customised Multistage Automatic Smartline equipment developed for our customers' requirements:

Multistage Automatic 3x180L

This system is built with 3 tanks for ultrasonic cleaning, hot rinsing and drying components from the medical-health sector. The design includes tables for loading and unloading the baskets containing the parts to be cleaned. It integrates a waterflow system for capturing oils and particles on the surface of the main tank and a filtering system TTF1.

Technical Specifications: Useful dimensions (in mm): 600x380x330 Internal dimensions (in mm): 700x480x640 Capacity: 180 litres/ 6.4 cu.ft.

Multistage Automatic 3x260L

This is a modular ultrasonic cleaning system with automated lateral transfer, for cleaning steel discs for the food sector. It integrates 3 tanks with a useful capacity of 260 litres each: an ultrasonic tank, a cold water rinse tank with sprinkler and a compressed air drying tank. The assembly has a security enclosure with light aluminum profile and steam extraction system.

Technical Specifications: Useful dimensions (in mm): 660x320x430 Internal dimensions (in mm): 800x400x800 Capacity: 260 litres/ 9.2 cu.ft.

Click <u>here</u> to request a quotation today!

Multistage Automatic 5X70L

This Ultrasonic system is custom made for ultrasonic cleaning and degreasing of medical instruments. It has been designed to be compact and space saving. The process is separated into 3 different stages: US and 2AF in one zone, AC in another area and vacuum drying in another zone. This system is automated and includes accessories for loading and unloading and manual drying.

Technical Specifications:

Useful dimensions (in mm): 410x360x485 Internal dimensions (in mm): 410x360x600 Capacity: 70 litres/ 2.5 cu.ft.

Multistage Automatic 5X250L

This modular automatic ultrasonic cleaning system is built with 5 tanks and has a capacity of 250 litres/ tank. This system is designed with: an ultrasonic tank, a hot rinse tank, a hot rinse tank with ultrasound, a 2nd hot rinse tank, a drying tank and loading and unloading area. 15 rotating drums are provided to house the parts to be cleaned. These will automatically rotate in line during the cleaning process, via the transfer of 1 galloping axis.

Technical Specifications: Useful dimensions (in mm): 460x400x460 Internal dimensions (in mm): 700x500x700 Capacity: 250 litres/ 8.8 cu.ft.

Multistage Automatic 7x500L

This installation incorporates 7 tanks with a capacity of 625 litres each. It has been custom made for cleaning of components for the industrial sector. The Multistage Automatic TT 7x500 system includes: 2 ultrasonic tanks, 3 tanks for rinsing and 2 tanks for drying.

Technical Specifications:

Useful dimensions (in mm): 500x750x210 Internal dimensions (in mm): 750x985x945 Capacity: 625 litres/ 22.1 cu.ft.

Multistage Automatic Ultrasonic Line

Designed for cleaning parts in the automotive sector, it comes with a 4-tank multistage ultrasonic cleaning line. Parts go through a hot rinsing stage, and ultrasonic cleaning step, a 2nd hot rinsing stage and then drying. In this case the loading and unloading area has been designed in front arrangement and the installation has been fully faired with folding security windows that allow access to the interior of the equipment.

Technical Specifications:

Useful dimensions (in mm): 1320x1320x750 Internal dimensions (in mm): 1500x1500x1080 Capacity: 2000 litres/ 70.6 cu.ft.

Multistage Automatic 2X3350L

This installation has been manufactured for degreasing large automotive components. It includes 2 tanks, with a capacity of 3,350 litres: an ultrasonic cleaning tank, a hot rinse tank and loading and unloading facility. The security enclosure is provided to prevent access to the hazardous areas while the machine is running. It also has an integrated steam suction system in both tanks with droplet separator.

Technical Specifications:

Useful dimensions (in mm): 2395x985x1000 Internal dimensions (in mm): 2520x1120x1390 Capacity: 3350 litres/118.3 cu.ft.

Multistage Automatic 5X2025L

An Ultrasonic Cleaning Installation built for the automotive industry and designed with 5 tanks. The cleaning process is carried out in this case from left to right according to the customer's requirements, with a gantry crane loading system to handle racks that transport parts up to 600 kg. The 5 tanks are arranged between the loading and unloading areas.

Technical Specifications:

Useful dimensions (in mm): 2300 x 400 x 1230 Internal dimensions (in mm): 2500 x 600 x 1425 Capacity: 2025 litres/71.5 cu.ft.

Technical Specifications for Other Mutistage Automatic Systems

Multistage Automatic 2x1000L

Built for cleaning application for Aerospace Industry. Useful dimensions (in mm): 830x2000x618 Internal dimensions (in mm): 880X2050X718 Capacity: 1000 litres/ 35.3 cu.ft.

Multistage Automatic 3x530L

Built for cleaning application for Graphic Industry. Useful dimensions (in mm): 400x750x750 Internal dimensions (in mm): 590x980x990 Capacity: 530 litres/18.7 cu.ft.

Multistage Automatic 3x10.000L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 1630x2650x1580 Internal dimensions (in mm): 1900x3000x1900 Capacity: 10000 litres/353 cu.ft.

Multistage Automatic 4x300L

Built for cleaning application for Aerospace Industry. Useful dimensions (in mm): 500x500x800 Internal dimensions (in mm): 570x570x1100 Capacity: 300 litres/10.6 cu.ft.

Multistage Automatic 4x1485L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 830x1090x660 Internal dimensions (in mm): 1000x1500x925 Capacity: 1485 litres/ 52.4 cu.ft.

Multistage Automatic 4x2500L

Built for cleaning application for Food Industry. Useful dimensions (in mm): 2500x1000x1000 Internal dimensions (in mm): 2700x1200x1200 Capacity: 2500 litres/ 88.3 cu.ft.

Multistage Automatic 4x7400L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 1000x2950x1200 Internal dimensions (in mm): 1400x3300x1600 Capacity: 7400 litres/261.3 cu.ft.

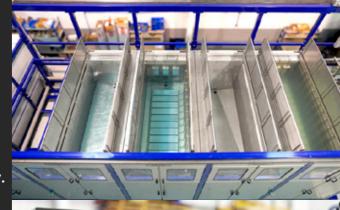

Multistage Automatic 5x100L

Built for degreasing application in Automotive Industry. Useful dimensions (in mm): 500x350x550 Internal dimensions (in mm): 500x350x700 Capacity: 100 litres/ 3.5 cu.ft.

Click <u>here</u> to request a quotation today!

Multistage Automatic 5x1000L

Built for cleaning application for Automotive Industry. Useful dimensions (in mm): 1200x800x900 Internal dimensions (in mm): 1200x800x1100 Capacity: 1000 litres/ 35.3 cu.ft.

Multistage Automatic 5x1100L

Built for cleaning application for Aerospace Industry. Useful dimensions (in mm): 850x1850x250 Internal dimensions (in mm): 1000x2015x655 Capacity: 1100 litres/ 38.8 cu.ft.

Multistage Automatic 5x11.000L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 1000x3500x1400 Internal dimensions (in mm): 1400x3900x1800 Capacity: 11000 litres/ 388.5 cu.ft.

Multistage Automatic 6x90L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 270x600x300 Internal dimensions (in mm): 430x750x460 Capacity: 90 litres/ 3.2 cu.ft.

Multistage Automatic 6x260L

Built for cleaning application for Food Industry. Useful dimensions (in mm): 300x500x700 Internal dimensions (in mm): 450x650x950 Capacity: 260 litres/ 9.2 cu.ft.

Multistage Automatic 7x3350L

Built for cleaning application for General Engineering. Useful dimensions (in mm): 1000x3500x1400 Internal dimensions (in mm): 1400x3900x1800 Capacity: 3350 litres/118.3 cu.ft.

Multistage Automatic 12x12L

Built for cleaning application for Pharmaceutical Industry. Useful dimensions (in mm): 300x200x200 Internal dimensions (in mm): 300x200x300 Capacity: 12 litres/ 0.4 cu.ft.

Accessories Ultrasonic Generators and Emiters

At ActOn Finishing we offer a range of generators and emiters based on the finishing requirements, part material and amount of dirt to be removed. From single-frequency equipment 28/40 KHz with Sweep System ±2% to the cutting-edge model SB10 generator, the completely digital SB30 generator and the Burst and Multitech frequency system.

Generator SB-2K-D

Available Powers: from 1000W to 2000W with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 28KHz (With sweep system up to +/-1.5KHz)
- 0 40KHz (With sweep system up to +/-1.5KHz)
- 0 40-90KHz (With sweep system up to +/-1.5KHz)

Operating system:

- 3.5" TFT color display with access to power change and basic settings.
- 0 Normal: Working point tracking, with three modes available.
- 0 Sweep System: Up to +/-1.5KHz frequency and speed modulation (adjustable parameters in model with display).
- 0 Burst System: Amplitude and speed modulation (adjustable parameters on display model).
- 0 Degas System: Degassing mode (adjustable between three modes in model with display)
- Ο Ext Control: Ultrasonic ON/OFF, sweep ON/OFF, burst ON/OFF, degas ON/OFF and RS-485 communication.

Generator SB-2K-L

Available Powers: from 1000W to 2000W with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 28KHz (With sweep system up to +/-1.5KHz)
- 0 40KHz (With sweep system up to +/-1.5KHz)
- 0 40-90KHz (With sweep system up to +/-1.5KHz)

Operating system:

- Power control from 10% to 100% on the front panel indicated with multicolor LED bar.
- 0 Normal: Working point tracking, with three modes available.
- 0 Sweep System: Up to +/-1.5KHz frequency and speed modulation (adjustable parameters in model with display).
- 0 Burst System: Amplitude and speed modulation (adjustable parameters on display model).
- 0 Degas System: Degassing mode (adjustable between three modes in model with display)
- Ο Ext Control: Ultrasonic ON/OFF, sweep ON/OFF, burst ON/OFF, degas ON/OFF and RS-485 communication.

Available Powers: from 2000Wp to 4000Wp, with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 0 28KHz (With sweep system up to +/-1.5KHz)
- 0 40KHz (With sweep system up to +/-1.5KHz)
- 0 40-90KHz (With sweep system up to +/-1.5KHz)

Operating system:

- 0 3.5" TFT color display with access to power change and basic settings.
- 0 Normal: Working point tracking, with three modes available.
- 0 Sweep System: Up to +/-1.5KHz frequency and speed modulation (adjustable parameters in model with display).
- 0
- 0
- 0 communication.

Generator SB-4K-L

Available Powers: from 2000Wp to 4000Wp, with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 0 28KHz (With sweep system up to +/-1.5KHz)
- 0 40KHz (With sweep system up to +/-1.5KHz)
- 0 40-90KHz (With sweep system up to +/-1.5KHz)

Operating system:

- Ο Power control from 10% to 100% on the front panel indicated with multicolor LED bar. 0 Normal: Working point tracking, with three modes available.
- 0 Sweep System: Up to +/-1.5KHz frequency and speed modulation (adjustable parameters in model with display).
- 0 Burst System: Amplitude and speed modulation (adjustable parameters on display model). 0 Degas System: Degassing mode (adjustable between three modes in model with display) 0 Ext Control: Ultrasonic ON/OFF, sweep ON/OFF, burst ON/OFF, degas ON/OFF and RS-485
- communication.

Burst System: Amplitude and speed modulation (adjustable parameters on display model). Degas System: Degassing mode (adjustable between three modes in model with display) Ext Control: Ultrasonic ON/OFF, sweep ON/OFF, burst ON/OFF, degas ON/OFF and RS-485

Generator SB-10 Digital

Available Powers: from 1000Wp to1700Wp, with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 0 28KHz (With sweep system up to +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 40-90KHz (With sweep system +/-2KHz)

Operating system:

- Normal: Working point tracking, with three modes available. 0
- 0 Burst: Amplitude modulation (adjustment set).
- 0 Sweep System +/-2%: Frequency Modulation (adjustment set).
- Ext control: ultrasonic ON/OFF by contact.

Generator SB-30 Digital

Available Powers: from 2000Wp to 3400Wp, with automatic power tracking, and optimum working point tracking, with three tracking modes, anti-stationary wave and anti-wave system in the tank.

Available Frequencies:

- 28KHz (With sweep system up to +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 40-90KHz (With sweep system +/-2KHz)

Operating system:

- Nomal: Frequency wave tracking. 0
- 0 Burst: Amplitude modulation (adjustment set).
- 0 Sweep System +/-2%: Frequency Modulation (adjustment set).
- 0 Ext control: ultrasonic ON/OFF by contact.

Generator S-30

Available Powers: from 2000 W to 3400 W, with 7 levels of power indicated on LEDs, Analogical Display, Power Control, Start/Stop, PLC alarm, preheating alarm and Open Short. Ext Control: ultrasounds ON/OFF by contact.

Available Frequencies:

- 28KHz (With sweep system up to +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 40-90KHz (With sweep system +/-2KHz)

Operating system:

- 0 Standard: Follow-up of the frequency wave.
- 0 Sweep System +/2%: Frequency Modulation (adjustment set).

Generator S-10

Available Powers: from 1000 W to 1700 W, with 7 levels of power indicated on LEDs, Analogical Display, Power Control, Start/Stop, PLC alarm, preheating alarm and Open Short. Ext Control: ultrasounds ON/OFF by contact.

Available Frequencies:

- 0 28KHz (With sweep system +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 40-90KHz (With sweep system +/-2KHz)

Operating system:

- Standard: Follow-up of the frequency wave.
- 0 Sweep System +/2%: Frequency Modulation (adjustment set).

Generator TT-10

Available Powers: from 600W, 700W, 800W, 1000W to 1500W

Available Frequencies:

- 0 28KHz (With sweep system +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 40-90KHz (With sweep system +/-2KHz)

Operating system:

Sweep System +/2%: Frequency Modulation (adjustment set)

Ultrasonic Emiters

We have a wide range of ultrasound emitters in standard measurements, as required. We design the emitter according to the customers' special application requirements.

Available Frequencies:

- Ο 28KHz (With sweep system +/-2KHz)
- 0 40KHz (With sweep system +/-2KHz)
- 0 Multifrequency 40-90KHz (With sweep system +/-2KHz)

Special high-frequency emiters:

- 70 KHz (Sweep System +/2%)
- 0 105 KHz (Sweep System +/2%)
- 0 120 KHz (Sweep System +/2%)

ACTON

Ultrasonic Cleaning Solutions

At ActOn Finishing we offer a range of Ultrasonic Cleaning Solutions developed for your finishing requirements. You can choose between alkaline, acid, stripping detergents, surfactants and neutral compounds.

Category		Alkaline Ultras	onic Solutions					Alkaline	Ultrasonic Solut	ions		
Material Name	Aliquat N	Ultrasonic 17	Ultrasonic 2	Ultrasonic 20	Ultrasonic 20 A	Ultrasonic 22	Ultrasonic 23	Ultrasonic 23L	Ultrasonic 24	Ultrasonic 4	Ultrasonic 41	Ultrasonic 5P
Description	Is a hygienizing and en- ergetic cleaner based on quaternary compounds and free of caustic alkalis, which combines a high cleaning power with a deep residual ca- pacity that prevents the proliferation of patho- genic germs in contact with surfaces.	An ultrasonic solution made for degreasing applications.	An ultrasonic solution made for degreasing applications.	A degreaser and decarboniser ultrasonic solution.	A degreaser for metal components.	An ultrasonic solution made for degreasing applications.	A degreaser and decarboniser ultrasonic solution.	Alkaline descaler and degreaser	Alkaline degreaser for pickling of car- bon steel and stainless steel	An ultrasonic solution made for degreasing applications.	Iron Phosphating agent for steam jet application	An ultrasonic solution made for degreasing applications.
Characteristics	It is an ideal product for thorough cleaning of the surfaces, where a highly hygienizing action is required. It is recommended for use in all types of industries where food is handled or stored: kitchens, cutting rooms, slaughterhouses, bakeries, workshops, etc	Alkaline based degreaser. Highly concentrated, developed to clean very dirty steel and light metal components (spare parts)	Detergent for iron and carbon steel. Removes encrusted grease sediments, oils and all kinds of dirt difficult to remove, preventing it from setting on clean parts again	High degreasing cleaner. Its carefully selected surfac- tants facilitate the penetration of the product into the dirt. Specially for- mulated to be used in hard waters, as it prevents the pre- cipitation of calcium and magnetic salts	Slightly alkaline degreaser, to be used as a cleaning detergent for metal parts, tooling & light alloys, including za- mac or cast alumi- num. Good capacity of dirt absorption & specially formulat- ed for the clean- ing of the rest of polishing pulp, oils, taladrinas & fats	The strongest alkaline degreaser for ferrous metals	Alkaline cleaner formulated to degrease steel surfaces and also indicated to remove phosphate layers.	Alkaline degreas- er, made with a balanced formu- lation of surfac- tants, complexing additives and alkalins, which give it properties spe- cially indicated to eliminate embed- ded sediments of fats, oils and any type of difficult dirt	Specific for pre-treatment prior to phos- phating, galvanic deposition and enamelling	Removes encrusted grease sediments, oils and all kinds of dirt difficult to remove, preventing it from setting on clean parts again	Created for the pre-treatment of steel, iron metals, alumin- ium and zinc. By spraying with a steam jet device	Cleaning and descaling of grease, oils and any type of tough dirt, preventing it from setting on clean parts again
Application	Cleaning any surface and utensil	For Iron made components.	Surfactants, solvents and alkalis	For Iron made components.	For light alloys	Ferrous materials	For Iron made components	Steel, phosphate layers	Stainless steel, iron and copper alloys	Aluminium, iron and alloys	Steel, iron metals, a Iuminium & zinc	All types of materials and metals
Dosage	10-20%	8-12%	2-5%	5%	Diluted in water at a ratio between 3& 5% depending on the type of dirt to be removed	3-5%	3-5%	5% and 10% according to the degree of dirt	2-5%	3%	1,5-2,5%	3%
Colour	Blue	Transparent	Yellow	White	Yellowish	White	White	Brown	Yellowish	Blue	Incolour - Pink	White
Appearance	Transparent liquid	Transparent liquid	Liquid	Powder	Liquid	Powder	Powder	Liquid	Powder	Liquid	Liquid	Powder

Ultrasonic Cleaning Solutions

Category	Alk	aline Ultrasonic Soluti	ons		Acid Ultrasonic Solutions						
Material Name	Ultrasonic 6	Ultrasonic 7	Ultrasonic 7W	Ultrasonic MP	Aliquat	Ultrasonic 250	Ultrasonic 251	Ultrasonic 2513	Ultrasonic 550		
Description	An ultrasonic solution made for degreasing applications.	An ultrasonic solution made for degreasing applications.	An ultrasonic solution made for degreasing applications.	An ultrasonic solution made for degreasing applications.	Sanitising acid-based cleaner	Metal deoxidiser	Descaling and deoxidizing ultrasonic solution.	Additive for aluminum pickling	Decalcifying cleanser		
Characteristics	Ink and light acrylic paint stripping. Ideal to remove grease and oils from any type of surface	Cleaning and descaling of cinders. To achieve these results, this product must be used in combination with Ultrasonic-A	Cleaning and descaling of charcoal. To achieve these results, it must be used together with the Ultrasonic-A	Very powerful degreaser indicated to remove oils and animal and vegetable fat. Indicated as a degreasing detergent for food circuits, pasteurisers and recirculation cleaning systems	It is a moderately acid product to be used in integral cleaning by contact of surfaces and utensils that have been strongly contaminated in the food industry, ho- tel business, large com- munities and areas, and institutional hygiene, where the lime tanks must also be descaled due to the hardness of the water	Removes tough dirt and all kinds of lime build-up. Very useful for applications where accumulated rust and dirt cause a problem for the use of metallic parts and machinery	Descaling detergent and metal deoxidizer. It removes all types of cal- careous incrustations on metal surfaces. Especially suitable for cleaning and descaling in acidic medium of ferric metals	Detergent specially formulated to be used as stripping of weld debris in aluminum parts by immersion	It is a high performance acid detergent that cleans and descales all types of calcareous incrustations		
Application	All kinds of surfaces	Iron, galvanised steel and aluminium	lron, galvanised steel and aluminium	Iron, steel	Plastics	Ferrous materials	Iron	Aluminum	Iron		
Dosage	2-5%	3%	3%	3-10%	1-10%	2%	To be used diluted in the water, in a proportion between 1% and 15% according to the level of dirt or oxide to elimi- nate	Diluted in proportions between 3 and 6% and with a bath temperature between 30 and 60°C	It is used by im- mersion or applied on the surfaces to treat in a dose from 1: 1 to 1:10		
Colour	Transparent	Yellowish	Yellowish	Brownish-grey	Blue	Transparent	Red	-	White		
Appearance	Liquid	Transparent liquid	Liquid	Liquid	Liquid	Transparent liquid	Liquid	Liquid	Liquid

Ultrasonic Cleaning Solutions

Category	Acid Ultrasonic Solutions		Stripping	Neutral Ultrasonic Solutions				
Material Name	Ultrasonic PRO	Ultrasonic 350	Ultrasonic 51	Ultrasonic 52	Ultrasonic 53	Ultrasonic 54	Ultrasonic Electro	Ultrasonic Mix
Description	Stripping ultrasonic solution	Stripping ultrasonic solution	Hot paint stripping ultrasonic solution	Alkaline additive version of the Ultrasonic 51	Stripping ultrasonic solution	Stripping ultrasonic solution	Ultrasonic cleaning detergent	Ultrasonic neutral cleaning detergent
Characteristics	A stripping gel for stainless steel indicated to clean aus- tenitic stainless steel and very strong alloy steel based on nickel and chrome. A subse- quent Antioxidant treatment is recommended for these parts	Detergent for cleaning and stripping of welds, austere ferritic and austenitic stainless steels, pickling local fast for all tanks, austenitic stainless steels and appliances, mechanical welded equipment and TIG/MIG welding. Used by immersion in ultrasonic cleaning machines	When warm, it has unique stripping properties for synthetic resins, primers, baked paints, powder paints, water-based paints and very resistant cataphoretic paints in short times	When warm, it has unique stripping prop- erties for synthetic resins, primers, baked paints, powder paints, water-based paints and very resistant cataphoretic paints in short times	Hot steel stripper (between 80 - 90°C) to strip synthetic resins, primers, baked paints, powder paints, wa- ter-based paints and even cataphoretic and anaphoretic dip paints in short times. It does not cause vapour formation problems	Hot steel stripper (between 80 - 90°C) to strip synthetic resins, primers, baked paints, powder paints, wa- ter-based paints and even cataphoretic and anaphoretic dip paints in short times. It does not cause vapour formation problems	A dielectric detergent to clean electronic cards, engines and electric parts. Removes encrust- ed grease sediments, oils or all kinds of dirt difficult to remove, pre- venting it from setting on clean parts again	Product specially formulat- ed to be used as an active detergent for the cleaning of tools by immersion in ultra- sonic cleaning machines. It is used as an enhancement product to increase the cav- itation power of acidic prod- ucts and alkaline products
Application	Steel	Stainless steels	Aluminium	Aluminium	Aluminium	Iron	Electronic boards	Most materials and metals
Dosage	0.5-1%	1-10%	100%	50%	40%	50%	2-5%	To be used diluted in the water, in a proportion between 0.1% and 0.5% according to the level of dirt to eliminate
Colour	Purple	Yellowish	Yellowish	Orange	Transparent	Brownish-grey	Red	Brown
Appearance	Liquid	Transparent liquid	Liquid	Liquid	Liquid	Transparent liquid	Liquid	Liquid

Special Ultrasonic Solutions

Ultrasonic 70	Ultrasonic Hidro
Ink cleaner	Anticorrosive solution
High performance degreas- ing cleaner for cleaning hot inks by immersion in ultrasonic machine. Exempt from caustic alkalis, solvents and petroleum distillates. Removes both water-based and solvent-based inks on all types of hard surfaces	It is a water displacing fluid, to be used in deoxidized processes, paint stripping, etc., as a fast water remov- al agent on metal surfaces. It gives the surface a light protective film suitable for long-term protection, both in storage and transport
All types of metals	All materials
According to level of dirt will be used diluted between 5 and 30% at a temperature between 60°C and 70°C	Used pure, undiluted
Yellowish	Brown
Liquid	Liquid

we manufacture

Bowls & Troughs

Each of our Bowls are simple to operate, highly efficient, and manufactured in classic designs and sizes to meet your unique applications. We also offer Troughs in many different sizes and an infinite choice of length and width combinations, making them one of our most versatile. These are particularly useful for larger components.

Duals

The orbital Dual finisher works to both deburr and dry in one single unit. This is both an excellent and economical finishing option.

Dryers

Our unique, elliptical-shaped Vibratory bowl drying machines are compact in size, and simple to operate. The design provides the flexibility to use it as an effective 1 lap drying process or a multi lap process. We also offer centrifugal dryers, conveyorised ovens and rotary dryers.

Wheel Polisher

Suitable for achieving a highly polished finish on wheels with different sizes (up to 610 mm), the AWP188 machine has been designed to be simple to operate and to produce excellent results. The wheel polisher is great for grinding, smoothing and polishing processes.

Centrifugal High Energy

Engineered with the latest technology, the drive mechanism is designed to produce high g-forces, resulting in shorter process times. This technology can be used for both wet and dry processes.

Centrifugal Disc finishing machines have been designed to be reliable and easy to operate. The spinning motion of the disc machine is given by the disc situated at the bottom of an open barrel. The rotating disc makes the media, compound and parts to move in a rolling motion, resulting in effective finishing process in the shortest time.

DLyte Finishing Technology is a fully automatic finishing system which enables you to deburr, grind, surface finish & mirror polish in one step. It is used for metal parts which require high performance or superior finishes, including steel and stainless-steel, cobalt chrome, titanium, nickel and other common metal alloys.

Wheel Blasting Systems

Shot Blasting Cabinets

We offer a range of Shot Blast Systems to help our customers achieve the surface finish they need every time. Whether you require to descale, remove corrosion, mill scale, paint or rust, achieve a smooth finish, deflash, polish or strengthen the metal we will offer you full support every step of the way.

Waste Water Treatment

Centrifugal Disc Finishing

DLyte Technology

At ActOn we now offer a range of Wheel Blast Systems to help you achieve the surface finish you need. We can cater to all your application requirements including descaling, removal of corrosion or rust, paint stripping, de-flashing, achieving a smooth finish, shot peening, polishing and surface preparation prior to coating.

During the finishing operation, the effluent can be polluted with oil, media and metal fines. Our customers trust us to help select a waste water treatment system that complies with the industry's growing regulations. Once processed, the effluent is treated in the ActOn centrifuge system before being discharged to the drain or recycled.

Subcontract Service

On top of our state-of-the-art machinery and consumables, we also supply a range of support & training services. Moreover, we'll tailor our services & products to your needs, not the other way around. Our finishing service is all about you.

We suit our Finishing Technology and Subcontract Services to cover your needs. From a proved surface finishing technology we will adapt it according to your requirement. Just <u>contact us</u>. We will do the rest.

Custom project development:

2. Assessment: we 3. Customized will carry out free 1. Finishing needs: engineering trials using ActOn concept and goals development technology 6. Commissioning 5. In-house validation 4. Production phase

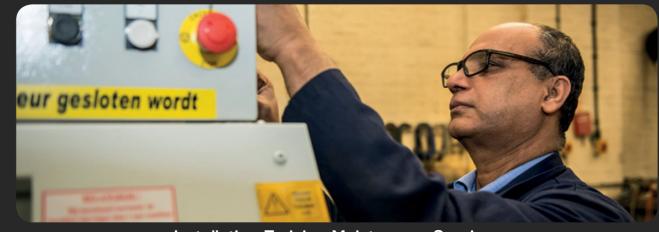

> Don't just think about it. It's now time to ActOn it.

CHEF, CLM, CDF, Shot Blasting & Vibratory Finishing Subcontract

Inspection Services

Installation, Training, Maintenance Services

Equipment Refurbishment & Spare Parts Service

What Our Customers Say

"Professional, knowledgable, on-time, good value and friendly. You couldn't want for more. ActOn are always the first place on our list for part finishing."

Samuel Nottage-McNeice, MAVEN Technology

"ActOn were quick to develop a solution for the shell cleaning system. The disc finishing machine has improved our throughput significantly and we are pleased with the quality of machine that they have manufactured and installed. We look forward to working with ActOn on future collaborative projects."

Henry Illsley (Shell Process Engineer), Rolls Royce Bristol

We pride ourselves on our excellence, and over the years we have successfully demonstrated an ongoing compliance with ISO quality and environmental standards. We're also an approved supplier for many of our industries, including medical and aerospace.

For ISO, we currently hold:

" The bitterness of poor quality remains long after the sweetness of low price is forgotten."

Benjamin Franklin
